

# **INSTALLATION PROCEDURE**

## **FOR THE LEDWL**

### **FLASHING WARNING**

### **LIGHT**

## **LED GROUND ILLMINATION LIGHT INSTALLATION PROCEDURE**

1. Thank you for purchasing an Innovec product. The LEDWL contains 60 red LEDs (light emitting diodes) is designed to flash at approximately 1 Hz when 120VAC power is connected.
2. The LEDWL is supplied in a surface mount plastic enclosure measuring 120 x 120 mm x 60mm deep. It has fixing centres of 86mm wide x 106mm high
3. To install, remove the clear enclosure lid by undoing the four lid retaining screws. You now have access to the fixing holes and the screw terminal.
4. The electrical connection is by 6 way pluggable screw terminals.

Terminal number	Function
1	Clock in (for using two LEDWL together)
2	Clock out (for using two LEDWL together)
3	Internal 0VDC
4	120VAC supply
5	Neutral supply
6	Ground
